Working during the coronavirus epidemic

Survey on the impact of the coronavirus pandemic on the daily lives of working people

N = 2053

Implementation of survey

- The survey was conducted by Kantar TNS on behalf of SAK.
- Materials were collected through GallupForum, an Internet-based respondent panel.
- A total of 2053 people responded to the survey, representing the working-age population (18-64 years) of mainland Finland.
- The materials were collected between 24 November and 3 December 2020.
- The statistical margin of error of the findings for the materials as a whole is about +/- 2.2 percentage points.
